PROVENCE collection

The Provencal style conveys us a feeling of well-being in a warm and natural environment, our imagination flies to these marvellous houses where the old touch acquires a great value.

As the time has been stopped, the Provencal style houses mix harmoniously natural materials as the stone, the tile, the brass and the wood, evoking a country lifestyle, simple and relaxed.

At FEDE, we fully identify with these style and we have created a special range including a new finish: the white decapé for the gangs and the rotary handle from our well known switch collections: Barcelona, Madrid and San Sebastian.

We manufacture this finish, painting by hand our brass base. Its artistic and exclusive value captivates us. There are not two equal frames.
